

Weekly Update

Nov 30 - Dec 4

This week, we mainly focused on finalizing our project and preparing deliverables for our client. Here is a summary of what we did:

- Finished writing and reviewing our 5-page report that summarizes our project and outcomes.
- Designed and created an engaging powerpoint to demonstrate our findings. We aimed to explain our thought process in four sections: Data Manipulation, Model Implementation, Trading Strategy Development, and End Analysis (Risks & Research Potentials).
- On Wednesday, we delivered our final presentation to our client. Cary was very satisfied with our results and findings.
- Added documentation to the scripts we built along the way and uploaded them to Github.
